## NEW WORLDS IN THE AREA OF HEALTHY LIVING VINYL FLOORS

Welcome to a new World of possibilities with our „World of SPC“ and „World of Dryback“ portfolio, opening up new horizons in the field of vinyl flooring. „World of SPC“ and „World of Dryback“ put the world at your feet. „With love from Germany“, the new portfolio offers a wide range of formats and designs fitted via Clicksystem and glued, all supplied with a 10-year guarantee.\* The three clearly defi-

ned collections of „Village“, „Town“ and „City“ offer a wide range of possibilities from entry level to heavy usage. Each offers something different within classic, wide and tile formats. Timeless and modern decors with 4V-groove options and the innovation of structured surfaces make the „World of SPC“ and „World of Dryback“ portfolio perfect for all your requirements.

### WORLD OF SPC

The „World of SPC“ floors, laid using the Clicksystem, have a plasticizer-free mineral base and rigid carrier board, which not only offers superb stability, but is also resistant to heat and moisture. These floors are therefore particularly suitable for residential areas subject to heavy use and can be laid up to floor-to-ceiling windows, in conservatories, bathrooms and kitchens. These SPC Vinyl floors are also ideal for renovation and refurbishment work, such as installation over existing sub-floors due to their rigid backing plate and low installation height.

#### ADVANTAGES „WORLD OF SPC“

- suitable for wet rooms, residential conservatories and floor-to-ceiling windows\*\*
- very hard-wearing
- low construction height
- plasticizer-free carrier board
- increased stability of the click connection
- suitable for underfloor heating\*
- easy to clean

### WORLD OF DRYBACK

The „World of Dryback“ collection includes water-resistant glued floors, which combine perfectly with hot water underfloor heating systems as the heat is particularly well conducted from the subfloor to the surface thanks to the full surface-wide connection. Due to the strong bond, no additional underlay for impact noise is required to reduce walking noise. In addition, there is nothing to prevent its use up to floor-to-ceiling windows, in residential conservatories, bathrooms and kitchens. Highly resistant and warm, Dryback floors bring such advantages as their low installation height, high load-bearing capacity and long service life as well as being phthalate-free, meaning, you can be safe in the knowledge you are protecting your home and the environment.

#### ADVANTAGES „WORLD OF DRYBACK“

- suitable for wet rooms, residential conservatories and floor-to-ceiling windows\*\*
- extremely hard-wearing, resilient and durable
- very low construction height
- very easy to clean
- warm to the feet
- noise-free
- phthalate-free
- suitable for underfloor heating\*

# TOWN COLLECTION

The „Town Collection“ expands the selection and introduces both wide and tile formats in addition to the classic with quick fitting Clicksystem. These three formats in an expanded selection of decors open up a myriad of options and possibilities. Thanks to the 4 mm thickness, 0.3 mm wear layer and utilisation class 32 this comprehensive portfolio of products can be laid in areas with average residential or commercial use. To add elegance to any area all boards are also supplied with a 4-sided bevel and 4V-groove.

# CITY COLLECTION

The „City Collection“ also offers classic and wide board formats in upgraded specifications of 4 mm thickness, 0.5 mm wear layer and utilisation class 41. However, the real highlight in the “City Collection” is the introduction of a synchronous surface structure. The unique look and feeling of a real wood effect floor is usually only reproduced in laminate flooring. The introduction of this innovative and natural looking product portfolio heralds a new dawn in what can be possible with vinyl products.

In line with such an innovation and natural looking product comes a range of classic and modern decors all offered with 4-sided bevel with 4V-groove. The perfect way to add style, finesse and practicality to any area whether residential, commercial or trade fairs and exhibitions.

# 1x4 COLLECTION

In the „1x4 Collection“ we present every stunning decor in 4 variations. The portfolio combines both SPC vinyl and Dryback options both in luxurious wide plank and classically appointed Herringbone formats. The SPC vinyl variations in Clicksystem installation style are available in 4 mm thickness with a 0.5 mm wear layer and utilisation class 41. The Dryback options offer 2.5 mm thickness with 0.5 mm wear layer and utilisation class 41. The finishing touch is a 4V-groove, which is located both lengthwise and widthwise around each board providing a striking but elegant appearance.

# »EQUIPPED«

**EQUIPPED** is the accessory brand we recommend for our products. You get a trim-coordinated strip for each vinyl floor, which allows you to hide a cable behind it with the option of attaching it to the wall via a clip system.

In addition, unsightly bumps, where two bars mounted side by side meet, can be avoided by using connectors. It is also recommended to install **EQUIPPED** accessories in interior or exterior corners. You save yourself the miter sawing. Rounded off by end caps on protrusions or door frames, the range offers everything needed to complete the installation.

Our Equipped underlay or impact sound insulation also offers a comprehensive and quality range.

The matching Equipped skirting, with a height of 58 mm in a modern profile, are assigned to the respective decors on the previous pages.

You can also find our edge strips at [check-floors.com](http://check-floors.com).

**White skirting boards** are also available in other designs and sizes.

All corners, connectors and end caps are available in the following colours:
